Dear Aaron:

Enclosed please find a copy of the video that I used as part of my presentation for the 1997 Robert Wartenberg Lecture at the annual meeting of the American Academy of Neurology. The version that I have enclosed is narrated.

I greatly appreciate your sharing the exciting and important data from your laboratory that went into this presentation. I have had a large number of requests for the videotape and will start to send out copies in the near future. The material that you provided was critical to its success and I think provided an important perspective for practicing neurologists and members of the American Academy of Neurology that are actively engaged in research.

I have tried to be as thorough and consistent as possible in providing appropriate credits to you and your laboratory both at the time that your data appears in the presentation and also in the credits at the end of the tape.

Once again, I greatly appreciate your sharing with me the data from your laboratory and I hope that you find the presentation enjoyable and informative.

Sincerely,

  
John C. Mazziotta, M.D., Ph.D.
